

## Handy Type Index

AMERICAN TYPE FOUNDERS

1. The first part of the paper discusses the importance of understanding the cultural context of the research. It emphasizes that researchers must be aware of the values, beliefs, and customs of the community they are studying. This is particularly important in cross-cultural research, where differences in cultural norms can significantly impact the results.

2. The second part of the paper focuses on the methodology used in the study. It describes the sampling process, the data collection methods, and the statistical analysis techniques. The authors highlight the challenges of conducting research in a non-Western context and the steps taken to ensure the validity and reliability of the findings.

3. The third part of the paper presents the results of the study. It shows that there are significant differences in the behavior of the two groups being compared. The authors discuss the implications of these findings for theory and practice, and they suggest areas for further research.

4. The final part of the paper is a conclusion. It summarizes the main points of the study and reiterates the importance of cultural awareness in research. The authors also provide a list of references for the sources cited in the paper.

# This Handy Index

shows one-line samples of all ATF faces currently manufactured for stock. Most of them are immediately available from your authorized ATF Type Dealer. This catalog also gives information on sorts, spaces and quads, leads and slugs, etc. For quick reference, see table of contents on this page.

It's EASY TO ORDER any of the type faces or accessories shown. Simply indicate your requirements on an order blank, as furnished by your dealer, or, if you prefer, use your own purchase order or letterhead and mail it to your ATF type dealer. In most cases, he will make prompt shipment from his comprehensive stock.

## How to use this Handy Type Index

TO HELP you CHOOSE the style and quantity of the face you need, just refer to the alphabetical listing of type faces. There you will find, accompanying each sample line, all you need to know about sizes made, number of characters in the font, etc. Here is an example of one of the entries with an explanation of the designations used:

### Bernhard Gothic Medium 525

18 pt. shown

PACK MY BOX WITH FIVE DJ  
Pack my box with five dozen jug|123

6pt	26A	58a	21-1	18pt	9A	24a	8-1	42pt	4A	8a	4-1
8pt	22A	52a	17-1	24pt	7A	15a	7-1	48pt	3A	7a	3-1
10pt	21A	47a	15-1	30pt	5A	12a	5-1	60pt	3A	7a	3-1
12pt	18A	42a	11-1	36pt	5A	10a	4-1	72pt	3A	5a	3-1
14pt	15A	35a	10-1								

### Name and Number of Face

The full name and face number (Bernhard Gothic Medium 525) should be stated, as in some cases several weights and widths of the same face are available.

### Alignment Position

The vertical rule in each specimen line graphically indicates the exact body size of the type. This enables you to see the placement of the face on the type body and the alignment position.

### Type Sizes

The point sizes given refer to the body size of the type. These are usually simple designations, such as 24 pt, 30 pt, etc. In some cases, different face sizes are available on the same body size, as in the Copperplate Gothics. For instance, 6 pt No. 1, 6 pt No. 2, 6 pt No. 3, etc. Sizes printed 18/24 or 120/96 should be read "18 point face on 24 pt body," or "120 point face on 96 point body."

Spaces and Quads.....	21 and 22

### Various Type Bodies

Most faces are now cast on a regular square body. Some are designed with an extreme slope, necessitating an angle body. Such faces are marked with a "bullet" or round dot. These fonts contain a sufficient quantity of angle spaces. Handmade scripts on wing bodies are Bank Script, Commercial Script, Royal Script, Typo Script and Typo Script Extended.

## Contents of a Font

Fonting schemes for every size are also shown. These schemes indicate the quantity of every character contained in the font, in a correct proportion based on the frequency with which the various letters of the alphabet are used.

In our example, 6 pt Bernhard Gothic Medium shows a scheme of 26A, 58a, 21 figures 1. To determine the quantity of the other characters contained in the font, refer to the table on page 23. For the caps, simply follow down the column headed 26. Do the same with the column headed 58 and 21 on the proper "Lowercase" and "Figures" tables.

## How to Order

When ordering type, be sure to specify the face name, number and the sizes required. For example:

### 1 FONT 6 PT BERNHARD GOTHIC MEDIUM 525

When you order one font, packages of caps, lowercase and figures will be supplied, or just caps and figures if no lowercase is made. Capitals, lowercase and figures are packaged separately and may be purchased individually. Just specify "capitals only," "lowercase only," etc., following the type size. Punctuation marks are supplied in both cap and lowercase fonts. Periods, commas, hyphens and dollar signs are also included with figures.

You will most likely need spaces and quads, too and perhaps leads and slugs as well. For information on these items see pages 21 and 22.

## Identification of Type

When type is ordered to match fonts of doubtful identity, set a word or two and compare with specimen words in this catalog. The face number is stamped on cap H and/or lowercase m where space allows. If still in doubt, the letters H and m, together with a printed sample of any other characters, should be sent with the order to insure positive identification.

## Typewriter Faces

When setting facsimile typewritten letters, extra fonts of lowercase characters are usually needed.

To maintain the appearance of typewritten copy, justifiers should be used between words instead of regular spaces. As justifiers have the same setwise thickness as the characters, they position the letters one above the other, as in typewriting. When ordering justifiers, it is advisable to send samples or to specify the typewriter face for which they are required.

## Accented Letters

Fonted assortments of SPANISH accented letters are available for some faces in 6, 8, 10, 12, 14, 18 and 24 point. See

page 20. Larger sizes of Spanish, or accented characters for other languages may be ordered as sorts, in 6" lines per character. (See pages 22 and 23.) When ordering sorts, specify type face and number, size, language and characters desired. If matrices are available, your order will be cast promptly. Sorry, no complete catalog of accented letters is available.

## ATF's Sorts Service in Lines

Sorts, in 6" lines per character, can be supplied for all active and discontinued type faces, ornaments, special characters, etc., for which matrices are in our possession. More detailed information is shown on pages 22 and 23 of this catalog. As sorts are cast to order, a few weeks must be allowed for delivery. *We regret that sorts may not be returned for credit.*

## Other Special Casting Services

ATF's Foundry Cast Adcents and Logotypes are economical and superior in quality to electrotypes. Matrices for almost all trade-marks, emblems, etc., can be engraved to your special order at reasonable prices. Typecuts cast from such matrices can be supplied in any number of 6" lines, with a minimum of one 6" line per cut. (A 6" line comprises as many type, cast from one matrix, as can be placed in a 36-pica line.) For additional information on this service, see pages 22 and 23.

## For Best Service

Your ATF Type Dealer will gladly answer any further questions you may have. He was appointed to be of help to you. Contact him on all matters pertaining to ATF type and foundry products. His inventory enables him to give you prompt service on most items manufactured by our foundry.

Ask him for a copy of our catalog describing the complete line of typographic accessories, such as ornaments, handypacks, initials, monograms, etc.

*You will encounter unnecessary delays by sending your orders direct to the type foundry. Contact your authorized ATF Type Dealer, always! He is most familiar with your requirements.*

## Important Notice

When a new font of type is to be laid in the case, first pull a proof of the font, to identify strange characters and to prove any claim for damaged or missing letters.

## Metal, Brass and Copper Thin Spaces

## Metal Thin Spaces

These are 2 point Duratin Leads cut to lengths which correspond to regular type bodies from 12 to 42 point. Packaged in 4 ounce cartons. Sizes available: 12, 18, 24, 30, 36 and 42 point. For larger sizes, regular Duratin Leads may be used.

## Copper and Brass Thin Spaces

Half point Copper and one point Brass Thin Spaces are put up in 2 ounce packages of one body size, either Copper or Brass. Sizes available: 6, 8, 10, 12, 14, 18, 24, 30, 36, 42, 48, 60 and 72 point.

For best service contact your ATF type dealer

# Type Foundry Spaces and Quads

## Precision-Cast in Type Moulds

### SPACES

are non-printing types less than one em in set width. Thickness is commonly designated by the number of pieces that add up to approximately one em, as 5-to-em, 4-to-em, and 3-to-em. ATF Foundry Spaces are graduated on the point-set system to quarter points. 10 point 3-to-em Spaces are  $3\frac{1}{2}$  points set; 14 point 3-to-em Spaces are 5 points set. 2-to-em is called EN SPACE.

### QUADS

are cast em-set, two-em or three-em. Sizes smaller than 14 point contain all three; 14 point to 24 point do not contain three-em Quads. Larger sizes are em Quads.

### SPECIAL HEIGHT,

Base Height and  $\frac{7}{8}$ -inch Spaces and Quads are cast to order in foundry lines only (see page 22). Spaces or Quads can be shaved down at the Foundry to desired LOWER heights at extra cost.

### INTERMEDIATE SIZES

—  $5\frac{1}{2}$ , 7, 9, 11, 20, 22, 54 and 66 point Spaces and Quads are not put up in fonts or packages. These and larger sizes — 84, 96, 108 and 120 point — are supplied as sorts only.

### JUSTIFIERS

When setting Typewriter type, use *Justifiers* instead of regular spaces. Send sample with order or specify typewriter face for which they are required.

## Set Widths of Spaces and Quads in Points

Pt. Size	SPACES					QUADS			
	Thin Spaces	Thinner Than 5-em	5 to Em	4 to Em	3 to Em	En	Em	2-em	3-em

# Duratin Metal Quotation Quads and Furniture

## Duratin Metal Quotation Quads

Cast in DURATIN Metal, with closed bottoms. Quads in packages No. 1 through 14 are .759" high, larger sizes are .795" high. Turned upside down, .759" quads may be used as electrotype base. A small rib inside open end provides grip for handling with tweezers. Made on regular type-casting machines, equally accurate as Foundry type. Each package contains a single size.

## Duratin Metal Quotation Furniture

Cast in DURATIN Metal, approximately .695" high, in sizes listed below. Each package contains a 36-pica line of one size.

## ATF Duratin Leads and Slugs

### Standard Body Sizes

Leads are strip-metal spacing material in body sizes 1, 2, 3 and 4 point. Slugs are strips of the same material, in body sizes 6, 8, 10 and 12 point.

### Duratin Leads and Slugs

are produced in strips 24 inches long. All metal is formulated at the refinery. Scrap metal such as old batteries, lead cables, etc., are not used for DURATIN.

### Standard Height

is .759" (electrotype base height). Other special heights such as .853" (high base) and .765" (Ludlow base) are made to order only. Inquiries for price quotations should state height and quantities desired.

## Sorts of Typecast Products in Foundry Lines

*All information given in this schedule applies to items in our current line as well as to inactive items.*

### What is a Foundry Line?

A "Foundry Line" comprises as many type, cast from one matrix, as can be placed in a 36 pica line (see illustration above).

The cut shown has a 42 point body and a 52 point set width. One 36 pica foundry line = 432 points. Therefore, one line would contain  $432 \div 52 = 8$  type.

Use the convenient CONVERSION TABLE on the opposite page to determine the quantity of type in one foundry line. Order a sufficient number of foundry lines to give you the quantity of type required.

### Why a 36 Pica Line?

A 36 pica line is the foundry's standard production unit. Fonts too, are made up to the 36 pica measure. However, in sorts one line will contain only one kind of letter, figure or other character.

### What may be Ordered as Sorts?

Any item, active or inactive, that can be cast by normal methods and for which we have matrices in our possession.

### Delivery

Foundry lines are cast as soon as possible after the order reaches the foundry, provided matrices are available. Since sorts are always cast to special order only, immediate delivery cannot be expected. Ask your ATF type dealer for current delivery information on sorts.

### Weight of 36 pica Foundry Lines

Point Size	Approx. Wt. in Pounds per Foundry Line	Number of Lines to One Pound	Point Size	Approx. Wt. in Pounds per Foundry Line	Number of Lines to One Pound
3	.070	14.29	18	.396	2.53
3½	.080	12.50	24	.504	2.00
4	.093	10.75	30	.625	1.60
4½	.098	10.20	36	.750	1.34

10	.216	4.63	84	1.750	.57
12	.264	3.79	96	2.00	.50
14	.302	3.31	120	2.50	.40
16	.336	2.98	144	3.00	.33

**Sorry, Foundry Lines cast to order may not be returned for credit.**

# Adcuts and Logotypes

## What are they?

Company or personal signatures, trademarks, emblems, symbols, designs or similar subjects can be cast in type in hard, long-wearing, foundry-type metal. These are called adcuts. Logotypes are combinations of letters, points, figures, fractions, or words which are cast for convenience on one body. All are cast on point-system bodies (the same as fonted type), and supplied in 36-pica foundry lines. And all print better, last longer and cost less than electros! They also phase with active or inactive ATF faces where necessary.

## Preparatory Work

There is a charge for tooling and preparation on initial orders, which can be supplied by your Authorized Dealer. Tooling for more elaborate designs, intricate detail, shading, mortising, or other special treatment is subject to prior quotation by ATF.

## Drawings or Art Work

In cases where the refining of artwork may be required in addition to normal preparation a charge will be made based on the quality and design of samples received. All drawings or artwork submitted for quotations should, therefore, be as large and as finished as practicable. In the event it is necessary or desired that ATF create finished artwork from sketches, quotations will also be given.

Preparations for casting are made for our own unique methods and systems. These remain ATF's property and are maintained for use on proper authorization. ATF sells only the product of its machines and preparation.

## Casting

Adcuts, logotypes, and special non-existing characters are priced in the same manner as all other sorts in 36-pica lines.

# THE ANATOMY OF ATF TYPE

## ALIGNMENT

In ATF type, alignment is built into the matrix. The base, or line, of the letter is an integral dimension of the matrix and is not left to the casting machine operator's discretion. Every letter cast from ATF matrices will align regardless of when it is cast. Casting machines not having this feature cannot constantly cast quality type. Accordingly, carelessness, lack of skill on the part of the operator, slippage or wear can all result in different adjustment and alignment on different letters or different castings.

## BODY

An efficient body must be strong. Making metal hard is a simple matter, but a metal that will withstand abrasion by paper stocks as well as the abusive pressures of printing and reproduction methods such as stereotyping, electrotyping, rubber plate molding, etc., must be more than hard. It must be tough. ATF type is tough but its toughness rests not alone in the metal formula. To produce a tightly compressed, fine grain metal the molten metal must be cast at high temperature under high pressure in a water-cooled mold. Ordinary type casting machines cannot match the high pressures or high temperatures of ATF casters and few are equipped with water-cooled molds. In consequence,

many competitors are unable to match the hardness of ATF type, even if they use ATF metal. By the same token, we can cast harder type from their metal than they can.

Accuracy is another important requisite of the type body. If the body of a character tapers in any direction or if its four sides are out of square, this character cannot set snugly against its neighbors, is bound to produce a spongy line or form. Here, again, the heavily constructed, non-adjustable mold which characterizes ATF casters assures a degree of accuracy which others can seldom match.

## COUNTER AND DEPTH

ATF matrices are engraved — not stamped — in hard nickel brass. They are cut with precision tools which assure clean walls and sharp edges, even at maximum depths. Most matrices are stamped or punched, rather than engraved. Because of this fact they require a softer brass and there is a definite limitation on the depth to which the punches can be driven, particularly in the shaping of counters.

## FACE

The face of ATF type has three distinctive features—its design, the efficiency with which it lays ink onto paper uniformly and sharply and

its position on the body. The design of ATF faces is the combined work of the best available talent in type design and type layout, assuring not merely novel but PRACTICAL faces. Their printability comes from their sharp edged, mirror-smooth face and can be obtained only by engraving of the finest sort. The final engraving of ATF matrices is done with tools as fine as .0015 in. thickness, which provide a fine surface for casting. However, ATF goes further to obtain a super-smooth printing surface by giving each matrix a light finishing coat of chromium.

As with "alignment," the position of the face on the body is a precise dimension in the matrix itself, achieved by expert hand finishing. It is not left to the operator, hence it is identical, regardless of when the type is cast.

## FEET

The feet of ATF type are always square with the body and parallel to the face, because of the heavy construction of the mold on ATF casters and the care expended in maintaining their accuracy at all times.

## GROOVE

The groove in ATF type is machined during the casting operation. ATF casting machine operators are careful to keep their grooving knives both sharp and properly adjusted and thus avoid the burrs that make some other types more than type high or uneven on their feet.

## SET

The set of ATF type, like its "alignment," is built into the matrix and is not subject to the variations of an adjustable mold. That the set is always identical in ATF type, regardless of when it is cast, is further guaranteed by the fact that the precise dimension of each character is stamped on the matrix as a guide to the operator and the inspectors who maintain a constant check on the accuracy of the ATF product.

Good letterspacing is normal with ATF type. Each character is fitted individually to look its best with all other letters in its alphabet. Overhanging letters set well because they are properly kerned and rubbed — a PLUS VALUE in ATF type.

## TYPE HEIGHT

The carefully controlled depth of ATF's engraved matrices, plus the equally accurate height of ATF molds, produces type of constantly uniform height. Further precaution against inaccuracy is the rigid ATF inspection which discards any type that is over .0005 in. high or low.

# ATF Types Offer You

numerous possibilities to express your message in the type best suited to the job. Specimen lines of more than 200 different faces are shown in this new index of ATF Types.

Skilled use of these types will add color and interest to any printed piece. Several of the new faces were designed to give display lines a "handlettered" look at only a fraction of the cost of made-to-order lettering!

## Best for Printing and Reproduction Proofs

As most printers know, *ATF type is the best quality foundry type available.* Because of a superior metal alloy used in a precision casting operation, it lasts longer and prints more clearly, with well defined detail. This makes it ideal not only for printing direct from the type, but also for top quality reproduction proofs. Yet ATF type costs little, particularly in the smaller sizes which many printers use only once and discard, without distribution.

## Offer Your Customers a Versatile Type Service with Only a Modest Investment

If you are thinking of adding a casting machine, particularly one for display lines, consider the advantages of far lower investment and greater flexibility of a selection of foundry type.

The wide range of styles and sizes available to you as you need them — the lower cost that makes it possible to discard old faces and add new ones as your requirements change — enable you to offer the most versatile type service with the smallest investment.

## ATF Types are Readily Available

ATF's network of type dealerships throughout the country insures immediate availability at convenient locations. In addition, a reserve stock is maintained at the foundry in Elizabeth, New Jersey.

*For quickest service, send your orders for type and foundry products to the authorized ATF Type Dealer in your area.*
